Experience

MedNet Technologies // Senior Graphic Designer & Front End Developer
January 2013 – Present

I conceptualize and design site layouts for medical professionals, dealing directly with clients from initial design consultations to the completion of their design. At times, I also structure the sites by building custom Wordpress themes, as well as filling and designing site content for the entire site.

Harrison Leifer DiMarco, Inc. // Graphic Designer

February 2012 – January 2013

I created high quality work while still meeting tight deadlines on multiple, over-lapping projects. I worked with branding, print, and web, for a wide array of clients, including organizations such as Sandoz, Island Harvest, Inwood Country Club, Blythedale Children's Hospital, and Lexington School.

Ultimate Athlete Magazine, Inc. // Director of Graphics

March 2011 – February 2012

As director of graphics, I was to oversee the art department, work with the editors to prepare for deadlines, and distribute work. As a graphic designer, I designed magazine layouts, including covers, advertisements, mailers, posters, and marketing forms, and maintained the company's website. I also worked on the marketing and event guide for the 2011 UnitedHealthcare Empire Challenge.

Town of Babylon Historic Services // Graphic Designer

March 2010 – Present

Starting as a paid intern, and moving on to a contractor, I designed boards and signs for public exhibit and information areas at the 50th Anniversary of Phelps Lane Park. I also designed all print and interactive material for the Town of Babylon History Museum, as well as a series of oversized displays at Town Hall.

Drs Y.T. Hwang and Matthew Lin // Medical Assistant/Secretary

September 2004 – Present

Elegant Affairs Caterers // Marketing and Advertising

September 2009 – August 2010
